BROWN PLANT HIRE (G & R BROWN & SONS PTY LTD) WAS FOUNDED IN QUEENSLAND IN EARLY 2002, WITH A MAJOR FOCUS ON RURAL ROAD RESTORATION AND MAINTENANCE FOR LOCAL GOVERNMENT. HAVING PROVIDED CIVIL PLANT HIRE SERVICES TO PRIVATE, LOCAL AND STATE GOVERNMENT AUTHORITIES THROUGHOUT RURAL QUEENSLAND FOR THE PAST 13 YEARS, OUR TRACK RECORD OF CONSISTENTLY DELIVERING EXCEPTIONAL RESULTS FOR OUR CLIENTS IS A TRUE TESTAMENT TO OUR EXPERTISE IN THE FIELD.

OUR PLANT & EQUIPMENT

GRADERS	TRUCK & DOG	DOZERS	COMBOS
ROLLERS	SKID STEERS	SIDE TIPPERS	WATER TANKERS
WATER TRUCKS	LOADERS	EXCAVATORS	SCRAPERS

EXPERIENCE TO DELIVER

Our growth has been strategically tailored around civil infrastructure construction and road pavement reconstruction throughout rural Queensland. In doing so, we developed a number of specialist civil construction crews, employing long-term highly skilled plant operators and up to forty pieces of plant ranging from GPS graders to side tipping triple road trains. Our commitment to our clients involves:

- On-site field maintenance and full support
- Premium client service and satisfaction
- Responsible environmental management and safe-work strategies.

Our service is delivered through integrated management systems that are based around **ISO9001** Quality Management, **ISO14001** Environmental Management and **AS4801** Safety Management standards and all other relevant legal requirements. All our staff are capable of working under a variety of management systems and have been fully trained to effectively implement our Management System on relevant projects. To date we have had no major quality, environmental or safety non-conformances and proudly maintain in excess of 2 years working LTI free.

COMPANY DETAILS

Company name: Brown Plant Hire

Trading name Brown Plant Hire

Year established: 2002

ABN: 33 154 911 609

ACN: 154 911 609

Registered address: 1000 Waterworks Road,
The Gap QLD 4061

Website: www.browncontractors.com.au

Phone/Fax: (07) 5424 7117

Postal address: Lot 5 D'Aguilar Highway

Head Office: Moore Qld 4314

Contact: **Adam Brown** | Director
m. 0428 983 194

3 SATISFACTION GUARANTEED

SAFETY

'Every one home safe everyday'

To eliminate accidents, it is not enough to set up sites safely and introduce rigorous processes to minimise risk. The key difference is in behaviour. For us, it starts at the top. Our Directors are committed and make the safety of our staff, our subcontractors and the public an absolute priority. An integrated system of managing health and safety is implemented for all work carried out under our contracts.

Environment

We are committed to minimising our environmental impact and conserving resources wherever possible. Best practice environmental management is integral to our approach to every project. We are sensitive to environmental concerns and work in partnership with local businesses and the community to create solutions that minimise environmental impact.

Expertise

Our management team comprises Engineers and Project Managers with 40 years of combined experience in government and mining infrastructure. Unlike other plant hire companies, we offer construction methodology advice based on extensive past project experience/lessons learnt. This gives our clients a powerful point of difference, with in-house capabilities ensuring streamlined project delivery.

INDIGENOUS PARTICIPATION

We strive to diversify our workforce and provide opportunities for individuals across a range of cultural backgrounds. By offering skills training in areas such as Rural First Aid, Traffic Control and Operation Ticketing, we aim to create local employment opportunities for Aboriginal people, enhance their business skills, and improve the social and economic conditions of Indigenous communities.

OUR FLEET

GRADERS

Machine: **Final Trim Grader**

Make/Model: **CAT 140H, CAT 120M**

- **Topcon/Trimble GPS**
- **Topcon mm control/Trimble UTS**

VALUE ADD

We appreciate that a good final trim grader operator can drastically increase your productivity, quality and substantially reduce overall project risk.

Subsequently, we ensure all our operators are competent and able to control entire work crews if required - i.e. directing rollers, water carts and traffic control during construction

When our Graders arrive onsite, they are setup ready to work immediately. Our experienced operators handle all machine control setup/design file installation

ROLLERS

Machine: **Smooth Drum, Pad Foot
and Multi Tyre Rollers**

Make/Model: **12 - 24 Tonne**

- **Pad Foot Shells**
- **Vibratory Control**

ADAPTIVE APPROACH

All of our roller operators are highly experienced in construction of embankment zones and road pavements

They are capable of assisting with the development of material specific roll patterns - ensuring each pattern is maintained and documented as required

WATER TRUCKS

Machine: **Body Water Truck**

Make/Model: **12 KL Truck Mounted**

- **Batter Spray**
- **Dribble Bar**
- **Fan Spray**
- **Hand Hose**

SEASONED OPERATORS

Our water truck operators understand the mechanics of laying a pavement or installing embankment material.

They are passionate about achieving a quality finish and providing proactive assistance to both the grader operator and rollers to ensure all lots are constructed in accordance with project specifications.

Majority of our water truck operators boast extensive experience operating rollers and have subsequently developed an appreciation for the roller operators requirements during pavement and embankment construction.

LOADERS

Machine: **Wheel Loaders**

Make/Model: **Hitachi / CAT**

- **Calibrated Scales**
- **Vibratory Control**
- **Rear Rippers**
- **ROPS/FOPS**

VERSATILITY

A variety of buckets that can be matched with onsite conditions and material to be handled, forks with optional clamps, and hooks for attachment to dumpsters, bins, troughs, etc.

Proven extensive experience operating on the following projects:

Subdivisions

Road construction

Flood restoration projects

Quarry operations

Drainage infrastructure

EXCAVATORS

Machine: **Final Trim Excavators**

Make/Model: **CAT 319DL**

- **Trimble GPS**
- **Tilt Bucket**
- **GP/Mud Buckets**
- **Ripper**
- **Grab**

REPEAT WORK

Our mission to ensure the sustainable growth of our business relies heavily on repeat work. Subsequently our policy is to only perform work we are capable and confident in performing to a premium standard.

In line with this commitment, we only provide expert excavator operators, tried and tested by management on previous relevant projects.

This way we can guarantee customer satisfaction and sustainable working relationships

DOZERS

Machine: **Tracked Dozers**

Make/Model: **D6 up to D11**

- **GPS Machine Guidance**
- **Rear Rippers**
- **Stick Rake**
- **ROPS/FOPS**

SUPERIOR CAPABILITY

Our Dozer operators boast significant relevant experience on civil construction projects servicing the following industries:

Oil and Gas Infrastructure

Mining Operations

Agricultural

Quarry Operations

Road Construction

Tree Clearing and Grubbing

Local and State Government Funded Projects

TRUCK & DOG

Machine: **Truck & Dog**

Make/Model: **Various**

- **Up to 35T Capacity**
- **Flashing Light**
- **Experienced Operators**
- **Access to built up areas**

CARRY MORE FOR LESS

If you are looking to cart material through built up areas and need to optimise the cost of cartage per tonne, look no further than a truck and dog.

Truck and dogs allow you to carry up to 35 loose tonnes per load for only a fraction of the cost more per hour than a standard single tipper.

Our experienced operators take care of our machines eliminating breakdowns and project delays.

WATER TANKER

Machine: **Water Tanker**

Make/Model: **24 KL up to 32 KL**

- **Batter Sprays**
- **Dribble Bar**
- **Fan Spray**
- **High Pressure Hoses**

SUPERIOR CAPABILITY

Highly effective on projects with vast construction footprints and excessive haul distances to water fill points

Useful for the re-filling of body water trucks unable to leave the work site during periods of high construction water demand

Our water tankers are packed with features that help reduce water wastage and improve wetting, cleaning and dust control performance

SIDE TIPPER

Machine: **Semi Side Tipper**

Make/Model: **Singles/Doubles**

- **Up to 50 T Capacity**
- **Flashing Light**
- **Experienced Operators**

GREATER CONTROL

Greater control over gravel tip rates during pavement construction - eliminating gravel wastage and additional grader time required to shift poorly tipped gravel piles.

Useful for tipping from the road shoulder into drains and onto batters.

SKID STEER

Machine: **Tracked Loader**

Make/Model: **CAT 289D**

- **Broom**
- **Bucket**
- **Profiler**
- **Auger**

TIGHT CORNERS

Reliable and durable, our skid steers are ideal for construction, landscaping, agriculture and site cleanup.

Our skid steers come with a variety of work tools including Augers, brushcutters, mulchers, trenchers, brooms and backhoes.

All our skid steer operators boast extensive civil project experience and have the capacity to install base course pavement to final trim tolerances.

RELEVANT PROJECTS

MT SALT BUSH RD ROMA

Client: **Decmil Engineering**

Hire Value: **\$3 Mil**

Machinery Supplied:

- 4 x Final Trim Graders - UTS and Topcon mm
- 4 x Semi Side Tippers
- 2 x 20T Excavators - Final Trim Trimble GPS
- 4 x Semi Water Tankers
- 2 x Body Water Trucks
- 2 x Pad Foot Rollers
- 2 x Smooth Drum Rollers
- 2 x Multi Tyre Rollers
- 1 x Loader
- 1 x D6 & D7 Dozers

Scope of Work

Drainage infrastructure and re-construction of 14 km of existing road

DHA - 44 TOWNHOUSES

Client: **Hindmarsh**

Hire Value: **\$ 600,000**

Machinery Supplied:

- 1 x Final Trim Graders - UTS and Topcon mm
- 2 x Semi Side Tippers
- 1 x 20T Excavators - Final Trim Trimble GPS
- 1 x Semi Water Tankers
- 1 x Body Water Trucks
- 1 x Pad Foot Rollers
- 1 x Smooth Drum Rollers
- 1 x Multi Tyre Rollers
- 1 x D6 Dozer
- 1 x Loader

Scope of Work

Construction of civil infrastructure for a 44 unit townhouse development in Enoggera QLD

DAWSON MINE UPGRADES

Client: **Anglo American**

Hire Value: **\$1 Mil**

Machinery Supplied:

2 x Final Trim Graders - UTS and Topcon mm

2 x Semi Side Tippers

1 x 20T Excavators - Final Trim Trimble GPS

2 x Semi Water Tankers

1 x Body Water Trucks

1 x Pad Foot Rollers

1 x Smooth Drum Rollers

1 x Multi Tyre Rollers

1 x Loader

Scope of Work

Drainage infrastructure and re-construction of 2 km of existing road

PAROO SHIRE NDRRA

Client: **Golding Contractors**

Hire Value: **\$1.4 Mill**

Machinery Supplied:

3 x Final Trim Graders - UTS and Topcon mm

4 x Semi Side Tippers

1 x 20T Excavators - Final Trim Trimble GPS

3 x Semi Water Tankers

1 x Body Water Trucks

2 x Pad Foot Rollers

2 x Smooth Drum Rollers

2 x Multi Tyre Rollers

1 x Loader

Scope of Work

Pavement re-construction, in-situ cement stabilisation, bulk haulage, bulk earthworks and drainage repairs

OUR SERVICES INCLUDE

Stormwater

Subdivisions

Road maintenance

Road re-sheeting

Road construction

Tree clearing

Dam construction

Car parks (D&C)

Hard stands

Road stabilisation

Bulk earthworks

Gravel haulage

House pads

Industrial pads

The background of the image is a faded, blue-tinted photograph of a yellow excavator. The excavator's arm and bucket are visible on the right side, while its large, treaded tire is on the left. Overlaid on this background is a large, bold, orange text block. To the right of the text, there are three solid orange vertical bars of varying heights, stacked vertically.
